{ Any single agent -
 Any multi agent - } → Deep Agent

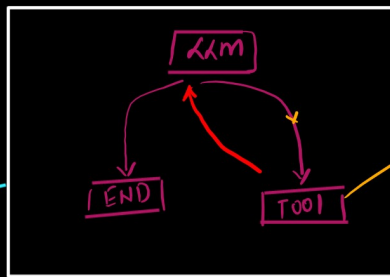

Hierarchical flow

Autonomy
LLM with tool calling
Dynamic basis

Re. Act

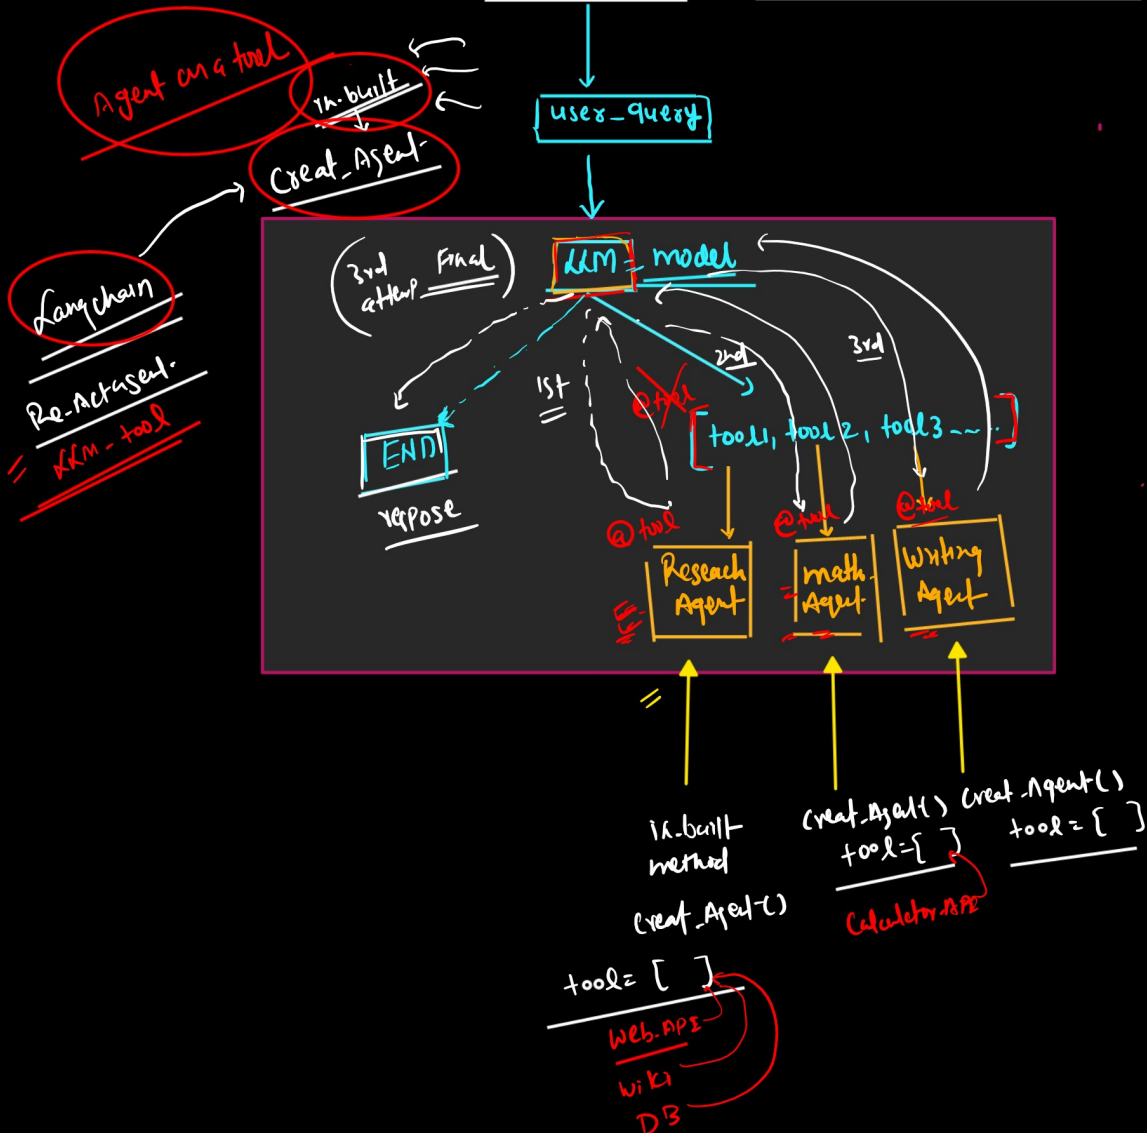

Reasoning - Action

(multiple tool)
Which tool needs to be call

from langchain.agents import create_agent

"Explain RAG briefly, calculate 25 * 16, and present the answer in a clean professional format."

```
main_delegation_agent = create_agent(  
    model=model, LLM  
    tools=[  
        ask_research_agent, Read - tool-acad [ ]  
        ask_math_agent, Read - tool-acad [ ]  
        ask_writing_agent, Read - tool-acad [ ]  
    ],  
    system_prompt=""  
    You are the main coordinator.
```

empty

You have three specialist subagents:

1. Research specialist
2. Math specialist
3. Writing specialist

Delegate work to the appropriate specialist tools.
You may call multiple specialists when necessary.
Finally provide one clear answer to the user.

```
""",  
    name="main_coordinator",  
)
```
